DOUG WIMBISH - LIVING COLOUR

HUNTINGTON III

The three-pickup Huntington III model pulls out all the stops with a trio of full-sized Gold Foil pickups and a piezo bridge as stock hardware. The magnetic pickups in the Huntington III are wired with individual volume controls, allowing the player to dial in a tremendous range of tones, from vintage to modern and all points in between. A push/pull switch on the tone control activates the piezo pickups, which are located in the bridge saddles.

SKU: 2043PTB MAP: \$1,099.00

HUNTINGTON II

The dual-pickup Huntington II model adds a second magnetic pickup in the neck position for ultra-deep bass and huge reggae tones. The neck pickup is reverse-wound for complete hum rejection when both pickups are used together. The Huntington II features individual volume knobs for each pickup, with the piezo option activated by a push/pull switch on the tone knob. The Huntington II is also offered as a piezo-equipped fretless.

SKU: 2042PMN MAP: \$924.00

HUNTINGTON I

The single-pickup Huntington I model projects a warm, balanced sound with a passive tone control that acts as an "old-school" knob, taming the highs and drawing the bass deeper back into the mix. A piezo-equipped bridge option, activated via toggle switch, enables acoustic bass sounds as well as enhanced attack for pick playing and slap. When the piezo pickups are activated, the tone knob allows the player to adjust the character of the piezo sound.
