## Supro Pedals

### FUZZ

MAP: \$199.00

### DRIVE

MAP: \$219.00

### TREMOLO

MAP: \$229.00

### BOOST

MAP: \$199.00

Supro stompboxes are hand-assembled in Port Jefferson, NY, USA. These state-of-the-art pedals feature custom-tooled, anodized, brushed-aluminum enclosures, 9V battery or AC-powered operation, rear-mounted metal jacks, easy-access side-mounted battery drawer, noiseless true-bypass switching and unique, expression pedal functionality.

The **FUZZ** uses a mix of N.O.S. Germanium transistors and matched silicon pairs to get Fuzz Face dynamics, Big Muff sustain and Tone Bender harmonics.

The **DRIVE** is a groundbreaking analog pedal that recreates the circuitry of a Supro tube amp, from end to end, including an actual output transformer.

The **TREMOLO** is an analog stompbox designed to recreate two of the most desirable vacuum tube-based modulation effects found in vintage American amplifiers.

The **BOOST** is a "clean" preamp ideally suited to pushing the front end of a tube amp, delivering up to 20db of J-FET boost plus optional HP and LP filtering.
